

Bar Code/QR Code/Metalphoto

Lordon is a leader in state-of-the-art bar code tags, QR code tags, markers, Metalphoto® and pressure sensitive labels. Our laser sharp 300 DPI resolution exceeds industry standards and improves first read efficiency 30% or more. In the field, reflective materials improve night time visibility substantially.

Photosensitive anodized aluminum Metalphoto tags are also available with the same quality barcodes and QR codes. As the name implies, photo quality images including linear and 2D barcodes as well as intricate logos can be produced and remain readable for a minimum of 30 years. Metalphoto meets a wide variety of specifications where durability is required.

STANDARD MATERIALS:

- Engineering Grade Reflectives
- High Intensity Prismatic
- Non-Reflective Vinyl
- Polyester
- Engraved Polyethylene Tag w/ Metalphoto® Barcode or QR Code Tag
- Acrylic
- Metalphoto
